Bender Enterprises Inc. Presents

Auto Theft in the 21st Century

Intensive 5-hour workshop

Workshop Information:

- ~ Latest statistics and trends
- ~ Keyless Entry, Smart Keys, Transponders, Immobilizers and RFID
- ~ Defeat & bypass techniques used by thieves
- ~ Component part identification and what they can tell us
- ~ Identifying Stolen Vehicles and their Components
- ~ Electronically stored VINs and other identifying data
- ~ Internet tools
- ~ Global Trends and their relationship to the U.S.
- ~ Subject matter expert from Mercedes-Benz will discuss what fraudulent schemes they are seeing and how to electronically identify them.

~ Vehicles have become rolling network computers equipped with evolving On Board Computers, Transponders and Immobilizers. As technology evolves, so do the techniques used to steal automobiles.

~ Automobile theft in the 21st century continues to evolve and requires a new understanding on how vehicles can be taken or defeated, and what to look for during an investigation.

~ Mercedes-Benz Investigative Expert will discuss current fraudulent activities and how to detect them electronically.

Current and upcoming trends and investigative techniques are identified, explained and solutions are presented.

Additional information is available at www.VINtrack.com/training.htm,

Testimonial

"Most informative class I've attended in 5 years of auto theft investigation"

"Your class was by far the most informative class offered. Everyone here at the auto theft task force agreed that your class was the best one offered at this year's conference"

"I have known Mike for years and I still continue to learn something every time I hear him speak. The feedback from his class was fantastic. Both the PD folks and the investigators all raved about what they learned/were impressed on how knowledgeable Mike was... This was some of the best training we have ever received"
